

### **Application Instructions for Grand Rock Deoxidizer - DeOx**

Grand Rock's Deoxidizer should be used with our Metal Polish as a 2 step process. Our DeOx has been specially designed to clean and deoxidize all metal surfaces without streaking, hazing, burning or etching the surface. It is the easiest and safest way to prep the metal before polishing.

**Step 1:** Saturate a cleaning cloth with Grand Rock's DeOx, wiping evenly onto the surface in 6 to 8 inch square sections. The metal will turn white, so do not worry, and **DO NOT WIPE OFF!**

**Step 2:** When the DeOx is dry, apply the Grand Rock Metal Polish, cover the entire DeOx treated area. Using a CLEAN dry towel lightly buff off black residue to a BRILLIANT SHINE!

### **Application Instructions for Grand Rock Metal Polish**

Grand Rock's Metal Polish can be used on several surfaces and be used for removing light scratches on plexy-glass, bug screens and plastic lens covers! You can apply it to hot or cold metal. **DO NOT USE** on GOLD or SILVER plating. Avoid using brighteners or ammonia based cleaning products between polishings. For the best SHINE, use mild soaps and water!

Shake well and apply a small amount on a clean cloth or terry cloth towel. Gently wipe on surface until shine starts to come through the black residue. Use a clean dry towel and lightly buff to a brilliant shine.

### **Application Instructions for Grand Rock WAX**

Grand Rock's Wax is a superior cleaning wax. It can be applied in direct sunlight and extreme temperatures and it will literally DUST right off!! Designed for Chrome and Stainless surfaces it's also excellent on clearcoat, glass and plastic surfaces as well. It can be used on gold and silver platings too!

Shake well, and apply a small amount on a dry cloth or terry cloth, evenly applying a thin coat using straight strokes. Let dry. The longer it sits on chrome or paint, the deeper the shine! Wipe or Dust off as needed with a clean towel or terry cloth. Enjoy the SHINE!

### **CAUTION: KEEP OUT OF REACH OF CHILDREN**

Harmful if swallowed. Do not induce vomiting, dilute with water. Call a physician immediately. Avoid contact with eyes, skin or clothing.
